PROFILE

I'm a passionate Full Stack Developer based in India, with a deep love for creating beautiful, functional, and user-centered digital experiences. With a background in Computer Science, I bring both technical expertise and creative problem-solving to every project.

WORK EXPERIENCE

Fliq AI MAR-2025 - SEP-2025
Frontend Developer | Remote

- Built responsive UI components for Fliq AI's web app using React, TypeScript, and Tailwind CSS, improving mobile usability and layout consistency.
- Collaborated with designers and backend engineers to implement new product flows, reducing UI bugs and handoff issues through clear Figma-to-code processes.
- Optimized page load and bundle size by refactoring components and cleaning unused styles, leading to faster navigation and smoother user experience.

Atrey.dev Jan 2025 - Present
Full-Stack Developer | Remote

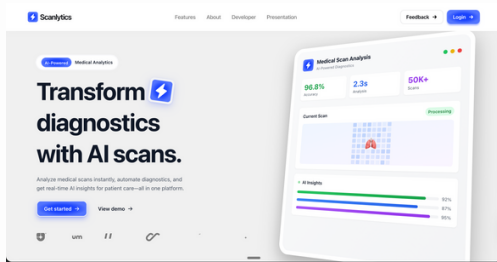

- Delivered 5-7 full-stack web projects for Atrey.dev clients, covering landing pages, dashboards, and internal tools end to end
- Built responsive frontends using React/Next.js and modern UI libraries, ensuring mobile-friendly layouts and consistent design implementation from Figma.
- Implemented and integrated REST/GraphQL APIs on Node.js/Express, handling database design and queries with MongoDB/PostgreSQL for production features.

EDUCATION

Bachelors in Technology | CSE 2024 - Present
ITM Skills University

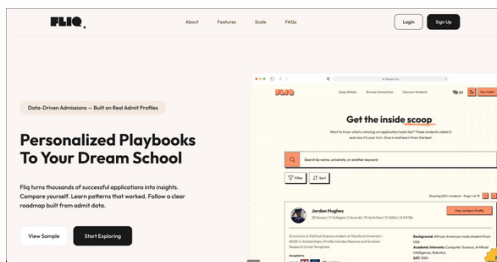

PROJECTS

Scanalytics

AI-Powered Medical Analytics Platform (Mumbai Hacks GenAI Hackathon)

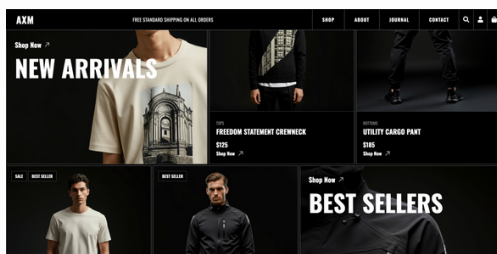

- Built an end-to-end web platform that processes medical scans in real time and generates AI-assisted insights to support faster and more reliable clinical decision-making.
- Implemented modules for automated scan upload, AI-driven analysis, and intuitive result visualization, enabling doctors to view critical findings, risk flags, and patient history in a single dashboard.
- Designed a clean, responsive UI tailored for hospital workflows, reducing cognitive load for clinicians and improving the usability of complex medical data.

FliqAI

AI-Powered College Admissions Playbooks

- Built a web platform that analyzes patterns from successful college applications to generate personalized, step-by-step admissions roadmaps for each student.
- Implemented features for comparing a student's profile against past admits, highlighting gaps in academics, activities, and essays, and suggesting actionable improvements.
- Designed an intuitive, student-friendly interface that makes complex admissions data easy to understand through clear visuals, progress tracking, and tailored recommendations.

AXM

Client E-commerce Website

- Developed a fully responsive e-commerce website for a client, enabling users to browse products, view details, and place orders through a streamlined, mobile-friendly interface.
- Implemented core commerce flows including product listing, filtering, cart management, and order flow, ensuring a smooth and intuitive shopping experience.
- Designed a clean, brand-aligned UI that highlights products and key CTAs, improving usability and helping the client better showcase their catalog online.
